VAISHNAVI KEDAR

Full-Stack Web Developer | UI/UX Designer | Computer Engineering
Mumbai, India | vaishnavikedar459@gmail.com
Portfolio / Design Folio | LinkedIn Profile | Behance Profile

OBJECTIVE

Full-stack developer and UI/UX designer seeking a paid internship with an international (Europe-based) team, contributing production-quality frontend/backend code and end-to-end product design to deliver scalable, user-centric digital products. Comfortable working async with distributed teams, translating design systems into responsive interfaces, and iterating quickly on feedback.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React.js, Responsive Web Design, Mobile-First Design
- **Backend & Data:** Node.js, MongoDB, SQL, Relational Database Design
- **UI/UX & Design:** Figma, Canva, Wireframing, Prototyping, User Research, Usability Testing, Design Systems
- **AI/ML:** Prompt Engineering, Generative AI, NLP, LLM Integration
- **Tools & Workflow:** Git, GitHub, GitHub Pages, VS Code, Agile/Iterative Development, Remote/Async Collaboration

PROJECTS

AyushLink *— Full-Stack / Healthcare-Tech (Ongoing)*

- Building an offline-first mobile healthcare app connecting ASHA workers, doctors, and patients through a single role-based record system.
- Working as Frontend Developer, building responsive, touch-friendly screens for patient registration, ABHA card scan, AI symptom checker, and digital prescriptions.
- Contributed to GitHub-based deployment and designed the project presentation for a Rotary Club showcase, communicating the app's offline-first architecture and community impact.

Role: Frontend Developer & Deployment | Duration: 4–6 months

Smart City Planning Dashboard *— Full-Stack / Data Analytics*

- Built a React + Recharts analytics dashboard computing a composite Smart City Score across population, traffic, air quality, and green-cover metrics.
- Developed a map-based infrastructure analysis engine benchmarking healthcare, transport, education, and safety coverage; integrated an AI model to rank infrastructure investments by cost-impact.

Role: Backend Developer & Data Handling | Duration: 1 month

Multilingual AI Translation Chatbot *— AI-NLP / Design*

- Built an NLP-based chatbot enabling real-time translation across multiple Indian regional languages, applying prompt engineering to improve accuracy.
- Published a case-study-driven UI/UX portfolio documenting research, wireframing, and high-fidelity prototyping workflows.

Role: UI/UX, Chatbot Generation, Prompt Engineering | Duration: 1 month

EDUCATION

SIES Graduate School of Technology, Nerul 2024 – 2028
B.E. Computer Engineering — CGPA: 9.86 (2nd Yr), 9.5 (1st Yr) | HSC: 84.17% | SSC: 88.60%

HACKATHONS

Drishti: A UI/UX Designathon *— CESA, VIT Mumbai (powered by Friends of Figma Mumbai & .xyz) Oct 2026*

- **Top 6 finalist** out of 193+ registrations. Designed **AVIRA**, a safety-first transit companion for women commuters, as a team of two: real-time safety-rated route planning, proactive “Avira Pulse” check-ins, automated arrival confirmations, and an instant SOS response workflow.
- Applied color psychology to drive action and trust: coral red/crimson reserved for SOS and emergency alerts, mint green/teal for verified safe routes and successful arrivals, on a minimal neutral canvas to keep route scores scannable on the go.

PixelVerse UI/UX Hackathon *— Google Developer Groups on Campus, SIES GST Mar 2026*

- Designed a UI/UX prototype for a civic issue-reporting app as part of a team, focusing on intuitive reporting flows, visual hierarchy, and accessible interface design under time constraints.

CERTIFICATIONS

- Figma Web Design — Simplilearn
- Foundations of Prompt Engineering — AWS Training & Certification (Jun 2026)
- SQL & Relational Databases 101 — IBM / CognitiveClass.ai (Jun 2026)
- AWS Solutions Architecture Job Simulation
- Web Development: HTML/CSS/JS — Udemy
- Generative AI Career Essentials — Microsoft & LinkedIn
- Canva Design Certification
